## PRAIRIE VIEW A&M UNIVERSITY

PRAIRIE VIEW, TEXAS

Volume 55  
Number 22

July,  
1981

MISS PV A&M received outstanding support from the university community during her participation on July 5 through 12 in the Miss Texas Scholarship Pageant in Fort Worth. A bus load of supporters attended the Talent Competition last Thursday evening.

### Campus Radio Station to Begin Broadcasts Aug. 1

KPVU-FM is scheduled to begin daily broadcasting beginning August 1, Shirley Staples, Head of the Department of Communications, announced.

President A. I. Thomas has appointed a special committee to promote interest and secure listeners for the new station which will serve a 40-mile radius, including seven counties.

The studios will be located in the Communications Center (Hilliard Hall) which is a completed renovated building providing first class facilities for both radio and television training and for other areas of journalism and communications.

The university station will operated on a diversified format, including news, public affairs, entertainment and educational programming.

Installation of radio equipment is continuing at this time and is expected to be completed for the grand opening of the station on August 1.

**HARD WORK BUT PLENTY FUN AND CREATIVITY** — Participants in the Annual Cosmetology Institute are pictured as they demonstrate various beauty techniques on an attractive subject.

## PV 1981-82 Budget Up 104%

The state appropriations bill which Gov. Bill Clements formally approved in late June includes funds totaling more than \$596 million for the Texas University System during the next two years.

Prairie View A&M's appropriation is \$25,543,541 for 1982; up 104% over the \$12,488,487 in 1981. The University will receive \$17,569,766 in 1983. Included in Prairie View's appropriations is \$2,700,000 for repair and rehabilitation of the Houston Nursing facility.

Assistant TAMUS Chancel-

lor Robert G. Cherry, whose responsibilities include liaison with the Legislature and explaining the system's fiscal needs, said TAMUS and all of its parts fared well during the recently completed session of the Legislature.

"Appropriations are the lifeblood of any state agency. We prosper or perish by the appropriations we receive for each biennium," Cherry said. "The Texas A&M University System was treated quite well by the last Legislature, and I can foresee two more years of growth and improvement in

our various programs."

Cherry cited the support that TAMUS received from Rep. Bill Presnal and Sen. Kent Caperton.

"Certainly we were fortunate in having Representative Presnal as chairman of the House Appropriations Committee and as one of the top leaders of the House," he said. "Senator Caperton, as a freshman member, performed magnificently and helped in many ways in getting our appropriations in the Senate as well as being author of several of our other bills."

### Alumni Association Annual Meeting Held in Dallas

The Prairie View A&M University Alumni Association held its Seventh National Convention in Dallas at the Marriot Hotel-Market Center on July 2-5.

The theme for the occasion was — "If We Don't Save Prairie View — Who Will?"

Highlights of the four-day convention included a panel discussion on Texas' Desegregation of Higher Education, a dramatic presentation by The Charles Gilpin Players; and the annual banquet which featured an address by Texas State Representative Wilhelmina Delco, chairman of the House Education Committee.

Opening sessions included preconference reports and business sessions, welcome remarks by the Mayor of Dallas, the Honorable Jack Evans and Dr. Marion J. Brooks of Ft. Worth. Workshop sessions were held during Friday afternoon which highlights various concerns of the organization membership.

Participants on the desegregation panel included Joseph J. Sautz, Coordinating Board, Texas College and University System; William A. McKenzie, Board of Regents, Texas A&M University System; Michael Middleton, office of Civil Rights, U. S. Department of Education; Taylor August, Office of Civil Rights; Reby Cary, Texas House of Representatives and Dr. A. I.

### Coach Jacket to Manage U.S. Teams In World Games

### Group Heading for Bucharest, Romania

Track and Field coach Barbara Jacket has been named Head Manager and assistant coach of the United States participants in The World University Games which are scheduled July 21-26 in Bucharest, Rumania.

Members of the U.S. group, some 70 athletes, coaches, managers and trainees for track and field, will leave for New York City on July 13 where they will be processed for the charter flight which will depart from New York on July 15 for Bucharest. United States representatives will return to the USA on August 1.

According to Coach Jacket, all athletes participating must be between the ages of 17-28. They must be either in College, out of college one year or plan to enter college within one year. "The contest is like the Olympics in that participants are from all over the world," Jacket said.

She credits the NAIA (National Association for Intercollegiate Athletics) for her being named to the key position of Head Manager for the group.

### Welch Foundation Makes Grants In Chemistry

A grant totaling more than \$1 million has been made to The Texas A&M University System to support chemistry research at three universities.

A check for \$1,074,500 will be presented by Jack S. Josey on behalf of the Robert A. Welch Foundation to fund 46 separate research projects in chemistry at Texas A&M, three at Prairie View A&M University and two at Tarleton State University.

John C. Calhoun, deputy chancellor for engineering for the Texas A&M University System, accepted the gift for chemistry research and praised the foundation for its significant contributions to the chemistry programs at the three universities.

Thomas, Prairie View President.

The Recognition and Awards Banquet Friday night featured presentations to students, a faculty member; Dean A. E. Greaux, several retired staff

## Academic Standards For Financial Aid Recipients at Prairie View A&M University

Federal regulations require that first-time financial aid awardees be considered capable of making satisfactory academic progress at Prairie View A&M University and continuing financial aid recipients demonstrate satisfactory academic progress in order to retain eligibility for financial assistance. New and/or continuing financial aid recipients must meet the minimum grade and hour requirements of academic progress defined below:

### First-time Recipients:

To be eligible for financial assistance, the transfer financial aid applicant must have maintained the prescribed grade point average shown below on all college work completed. All other first-time applicants must be accepted to Prairie View A&M University and be in good standing with Prairie View A&M University.

**Continuing Recipients:**  
**Full-time Students** (12 hours or more each semester): Aid recipients are required to successfully complete at least 18 hours per academic year (fall and Spring Semester) and maintain a cumulative average as prescribed below on a 4.0 scale.

**Part-time Students** (11 hours or less each semester): Aid recipients are required to successfully complete at least 12 hours per academic year (fall and Spring Semester) and maintain a cumulative average as prescribed below on a 4.0 scale.

**Summer Session:** If enrolled in summer session, aid recipients are required to complete at least 6 hours if full-time, and 3 hours if part-time. Recipients are also required to maintain the same grade point standards given below.

### Student in Good Standing

Any student who has on his record two Grade Points for each semester hour counted toward his degree or certificate

shall be considered in good standing for purposes of Financial Aid.

### Probation

Any student who has on his record 1.0 Grade Point Average to 1.9 Grade Point Average for each hour counted toward graduation shall be considered on probation.

### Disciplinary Action

Any student who has less than 1.0 Grade Point Average for each hour counted toward graduation shall be discontinued from financial aid for at least one semester or one full summer term.

### Recommended Minimum Progress in Grade Point Averages

|  |     |
|--|-----|
| 24 to 36 semester hours counted toward graduation  | 1.4 |
| 37 to 72 semester hours counted toward graduation  | 1.6 |
| 73 to 108 semester hours counted toward graduation | 1.8 |
| For study beyond 108 semester hours attempted      | 2.0 |

Students denied aid may request a Review of the decision concerning their academic progress if they feel extenuating circumstances affected their performance or if there is an error in academic records. Review request must be in writing and completed on the attached Financial Aid Review Form. All written requests will be reviewed by the Financial Aid Review Board.

Any student who is denied assistance based upon satisfactory academic progress may regain eligibility for assistance by completing one full-time semester with a C average at the student's own expense. In all instances, a conference with a Financial Aid Counselor is required so that future aid can be properly discussed and determined.

## Public Education: America's Strength

**119th Annual Meeting • Minneapolis, Minnesota • July 2-7, 1981**  
 Nearly 10,000 teachers, school support personnel, college professors and other elected delegates from all over the United States will be there — at NEA's 119th Annual Meeting in Minneapolis, Minnesota. Delegates will come to elect NEA officers, vote on Association policy matters and grapple with the crisis the public schools are facing — in public confidence as well as in financing.

Specifically, delegates are likely to discuss proposed cuts in federal aid to education, the fiscal crunch that confronts many states, and how NEA is and should be fighting back.

## Two Black Artists:

**JOHN SCOTT  
and  
CLARENCE TALLEY**

**July 9-28  
LSU Union  
Art Gallery**

Opening Reception:  
 Thursday, July 9, 7:00 p.m.

Sponsored by the LSU Union  
 Black Culture Committee, Baton Rouge

**TALLEY EXHIBITS WORKS AT LSU** — Clarence Talley, Assistant Professor of Art at Prairie View A&M University, will be one of two artists featured in an exhibit at the LSU Union Art Gallery, July 9-28, 1981. The exhibit, entitled *Two Black Artists: John Scott and Clarence Talley*, will give the LSU and Baton Rouge communities an opportunity to experience the work of these two fine artists.

The exhibit is being sponsored by the LSU Union Black Culture Committee. An opening reception was held at 7:00 p.m. on July 9.

## Black Population Set at 26.5 Million

The number of blacks in the United States has increased 4.1 million during the past decade and 12 states now have black populations of at least 1 million, reports the Census Bureau.

The nation's overall black population, as recorded by the 1980 census, stands at 26.5 million or 11.7 percent of the total.

Ten years ago, only nine states had a black population numbering 1 million or more, and the total black population was 22.5 million.

Preliminary 1980 census

figures put New York at the top of the list with 2,401,842 blacks. Vermont, the bureau said, had the fewest, with 1,135.

The other states with black populations of 1 million or more are California, 1,819,282; Texas, 1,710,250; Illinois, 1,675,229; Georgia, 1,465,457; Florida, 1,342,478; North Carolina, 1,316,050; Louisiana, 1,237,263; Michigan, 1,198,710; Ohio, 1,076,734; Pennsylvania, 1,047,609; and Virginia, 1,008,311.

The bureau reported blacks constitute more than 20

percent of the population of seven states — Mississippi (35.3 percent); South Carolina (30.4); Louisiana (29.4); Georgia (26.8); Alabama (25.6); Maryland (22.7); and North Carolina (22.4). Of those seven, only Georgia, North Carolina and Louisiana have more than 1 million blacks.

In the District of Columbia, 70.3 percent of the populations in 1980 was black, the bureau reported.

The bureau said its estimated undercount for blacks in 1980 was between 4.5 percent and 5.5 percent, while the undercount in its 1970 estimate was 7.7 percent.

Another Census Bureau report Sunday said about 53 percent of the nation's blacks lived in the South, despite many decades of migration to the North and West.

The bureau said 6.4 percent of the population was of Spanish origin, with more than 60 percent of the 14.6 million total living in three states: California, Texas and New York. Spanish origin persons comprised more than 10 percent of five states — New Mexico 36.6 percent; Texas 21 percent; California 19.2 percent; Arizona 16.2; and Colorado 11.7 percent.

Infallible way to slim down: Live on the sixth floor. When a meal is served, take one bite, then fling the fork out of the window. Walk downstairs, retrieve the fork, and climb back up. Repeat until your plate is empty.

## Century Two Book Review

The CHANEYSVILLE INCIDENT BY David Bradley was reviewed by MRS. DOT-TIE MALONE-ATKINS on Wednesday Evening, June 24, 1981 at 6:00 o'clock at the President's Campus Residence.

## The Eye of Heaven

Once I looked across Life's sea  
 And the setting sun looked back at me:  
 Midst his wind raised waves,  
 and a rainbow len,  
 That would nev'r be captured  
 by the Golden pen.

Seemed, there, a storm  
 arched his brow,  
 From whose silver tip clouds  
 proceeded the show'r.  
 The light'n dash! And on his  
 pupil peeked,  
 While the thunder's voice to all  
 did speak.

Seeing all as one is but an  
 elusion.

There's no storm of rain near  
 the true setting sun,  
 For there is a place where  
 clouds are not.

Where the blue of heaven  
 claims an endless sport.  
 Far, beneath the sun's path  
 the storm still rage  
 As a venturing terror on a  
 suspended stage.

But I can see far, far away  
 To a clear and transparent day.  
 Daniel Kirkwood

Some people not only cross  
 their bridge before they come  
 to them, but keep on crossing  
 them after they are over them.  
 —Henry Wheelock

**ATTENDS PHOTO WORKSHOP** — Paris Kincade, photographer and communications assistant, has been awarded a Certificate of Achievement acknowledging completion of a seminar of advanced work in modern photographic techniques. The three-day seminar was sponsored by Eastman Kodak Company and was held in June in San Antonio.

## Black College Enrollment Doubles; Overall School Enrollment Declines

The number of black students enrolled in college nearly doubled between 1970 and 1980, according to a report on school enrollment published by the Commerce Department's Census Bureau.

About 1 million blacks, 14 to 34 years old, were enrolled in college in October 1980 compared to about 522,000 in 1970.

Overall school enrollment reflects a decline in the number of births that began in the early 1960s, the report shows.

The 57.3 million people aged 3 to 34 years enrolled in school in October 1980 number 3.6 million fewer than in 1975.

The report says the long-term decline has been largely in elementary school enrollment which totaled 27.4 million in 1980, some 6.5 million or 20 percent less than the pupil population in 1970.

From 1979 to 1980, high school enrollment dropped by about half a million to 14.6 million, also reflecting a decline in the eligible age group. There were about 1 million fewer high school students in 1980 than in the mid-1970s.

Enrollment in nursery schools went counter to the overall trend. At 2 million in 1980, it was almost double the 1.1 million enrolled 10 years earlier.

College enrollment totaling 11.4 million in 1980 reflects in part the rapid increase in the number of part-time students. The number of part-time students increased 84 percent compared with a 24 percent growth in full-time enrollment.

The report shows black enrollments of 4.3 million in elementary school, 2.2 million in high school, 490,000 in kindergarten and 294,000 in nursery school.

This compares with Hispanic enrollments of 2.4 million in elementary school, 1 million in high school, 263,000 in kindergarten and 146,000 in nursery school.

OPEN  
 11 a.m. to 9:00 p.m.

**Try Our New  
PIZZA  
CATERING**  
 Call 372-2031  
 Waller

High school dropout rates were also indicated in the survey. In October 1980, the report says, 23 percent of the black population, 18-21, had not finished high school and were not enrolled in school. This compares with about 40 percent for the corresponding Hispanic group. The figure for all persons in that age group was 16 percent.

Data in the report are based on a sample survey, and are subject to sampling variability and errors of response and underreporting. A detailed explanation appears in the text of the report.

Copies of the report, *School Enrollment: Social and Economic Characteristics of Students October 1980* (Advance Report), P-20, No. 362, may be obtained for \$4.00 prepaid from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from Commerce district offices located in major cities in the United States.

## Accounting Prof. Receives CPA Certificate

Mr. Darshan Wadhwa, an Assistant Professor in the College of Business was awarded the CPA Certificate at a ceremony at the Warwick Hotel in Houston, Texas on June 4, 1981. Mr. Wadhwa becomes the sixth faculty member in the College of Business to achieve this distinction. The presentation was made by the Texas Society of Certified Public Accountants.

### SUCCESS STORY

Who invented the first TV dinners? Gilbert Swanson, board chairman of a poultry company at the time, was the fellow. One night in the early 1950s, he was trying to balance a plate on his knee while watching television, and the notion hit him.

## Extension Conducts Canning and Freezing Workshop

Getting back to the basics of preserving and maintaining fruits and vegetables was demonstrated in a canning and freezing workshop held Thursday, June 18th by the Cooperative Extension Family Resource Development Program (FRDP) at Prairie View A&M. The workshop, which was conducted in the College

of Home Economics, was hosted by Mrs. Elaine Ward, Program Specialist in FRDP. The workshop was designed to provide FRDP program aides with practical techniques involved in freezing and canning fruits and vegetables in order that they share this information with members of their community. Vegetables

such as squash, corn and okra were pre-cooked and placed in self-sealing jars for processing. These low acid vegetables were then placed in a pressure canner for boiling. Mrs. Ruby Ragsdale, County Extension Agent from Washington County provided training in canning and stated that "the pressure canner method is

necessary for processing all non-acid vegetables in order to prevent possible spoilage and/or botulism." Mrs. Ward conducted the training in freezing techniques and pointed out that "careful selection of foods to be frozen is important because the food coming out of the home freezer or the freezer locker is no

better than it was before it was frozen and stored." The program aides were given instruction in the techniques involved in freezing peaches. They made sugar syrup for the peaches by combining sugar, water and powdered ascorbic acid. This syrup was then poured into pint freezer containers and the peaches were peeled and placed in the containers. Freezer paper was placed on top of the peaches, and they were sealed and placed in the freezer immediately.

It was recommended that fruits and vegetables be stored at 0° or below to maintain freshness.

Mrs. Ward's special guest at the freezing and canning workshop was a visitor from Syria named Mrs. Amoudi who worked in the Ministry of local Administration in her country. Mrs. Amoudi was very impressed with the workshop and stated that she "learned more from her two-day visit at Prairie View A&M University than she had in her entire length of stay in this country."

The freezing and canning workshop was indeed very informative for those persons in attendance, and workshops such as this one will continue to be held to provide basic instruction in practical home economic tips.

Program

## NEWS OF SCIENCE

Life without a heartbeat is now possible, thanks to a new type of blood pump developed by an Austrian scientist.

Professor Johann Navratil has been conducting research in Vienna on the problems of the "artificial heart," for the past 12 years. He recently disclosed his development of a pump which can serve as at least a temporary substitute for the heart.

An Austrian scientist has developed a new type of blood pump which performs normal functions of the heart.

After a heart failure, medication often is not able to restart the heart. Professor

Navratil's mechanical pump can maintain blood circulation, enabling the heart to rest and heal completely.

So far, the device has been used successfully only in experiments with calves. The laboratory animals have lived for up to eight weeks while the device performed the functions of the heart.

Professor Navratil is working with membrane pumps which, he believes, could lead to development of a functioning artificial heart.

"I sometimes wonder if whoever invented the boom-rang also invented the credit card!" —Barbara Bel Geddes

## Extension Assists in Establishing Water System

Starr county is located in south Texas along the Rio Grande City River bordering Mexico. Its capital city is Rio Grande City, an unincorporated municipality. According to the 1979 census, there are 22,300 residents of Starr county with a per capita income of \$3,640, the lowest of 254 counties in Texas.

Lazaro Rodriguez, Starr county agricultural program aide, Intensified Farm Planning Program (IFPP) of the Cooperative Extension Program, Prairie View A&M University provides educational assistance to low-income farmers and individuals of the county to assist them in raising their level of living. Several years ago he observed that many of the county rural residents did not have water in sufficient quantity suitable for human consumption, livestock and home gardening. Water was being obtained from contaminated areas near cess-pools, salty water wells, or hauling it from the city in barrels at a cost of \$25-\$30 per 1000 gallons. There is no city owned water supply. Water is furnished through a water district.

Lazaro Rodriguez was the primary catalyst in getting the El Tanque water system established. He sought assistance from Farmers Home Administration. FHA personnel advised him of the

procedure for making application for a loan and grant. Rodriguez organized the property owners in the manner specified and was able to obtain both a loan of \$183,000 at 5% interest annually and a grant to finance the water system. With these funds, 28 miles of pipeline was installed to 125 customers. More persons are being added to the system. The majority of these individuals are IFPP cooperators (Small Farmers). These individuals now have fresh water safe for human consumption, livestock and gardening. They pay an average of \$24 per month per customer. From these funds, the loan is being repaid. This project took three years to complete and is run by a Board of Directors as a non-profit organization.

These cooperators have been taught that through organizing as a group, significant advancements can be achieved in raising their level of living. They are now receiving an average of 12,000 gallons of water for \$24 whereas this same amount would have cost \$360 if hauled from the city. This is a savings of at least \$42,000 per month on water costs alone. In addition, water health problems are avoided, and more livestock and vegetable gardens are now being grown for additional income.

COSMETOLOGY INSTITUTE — Activities such as those pictured above were well attended during the June 8-26 program. A Cosmetology Trade Show was conducted on June 8.

## KPVU-FM 91.3 mhz

### The Positive Radio Experience Stereo

Prairie View A&M University is pleased to announce a new, full service public radio station in the Department of Mass Communication, Communications Center, Hilliard Hall. KPVU-FM, 91.3 Stereo, is a 7.5 Kilowatt station broadcasting 18 hours per day with sign-on at 6:00 a.m. and sign-off at 12 midnight. It's new, it's exciting, and in the Prairie View tradition, it is a positive public service thrust serving a 7-county coverage area within 40-mile broadcast range. The programming is educational, informational, cultural and entertaining. From jazz to country, KPVU-FM is yet another indication that Prairie View A&M University is going places in the 1980's.

Argentina, which slaughters 15 million head of steer year, is the South American leader in beef exports, National Geographic reports.

## Day Camp Sponsored by Youth Program

The first Cooperative Extension Day Camp of Prairie View A&M University was held June 24 thru 26 from 8:00 a.m. to 1:30 p.m. on campus. The Day Camp, which is a function of the Cooperative Extension Youth Development Program was also held at the Blueridge Baptist Church Youth Center in Houston, Texas at the above mentioned times and dates.

Sixty (60) youths from Harris and Waller counties participated in a variety of activities that were provided by the Day Camp Staff. These activities included a nature hike, group dynamics, discussion periods, arts and crafts, folk and disco dancing, song leadership and fitness fun day. The youth culminated the week's activities with an educational field trip to the Alabama Coushatta Indian Reservation in Livingston, Texas on Friday, June 26, 1981.

Free lunches, provided through the Summer Food Service Program were served to the campers on a daily basis. The free lunch service will continue for campers throughout the camping season.

The next camping events are scheduled for the following dates and locations:

**Harris County**  
Pinemont Community Site, 6234 Neuben Street, Houston, Texas — July 8-10, 1981.
